

Larvitt inneholder kvarts.

Ved bearbeiding av steinen

skilles det ut kvartsstøv. Som er giftig ved innhalering.

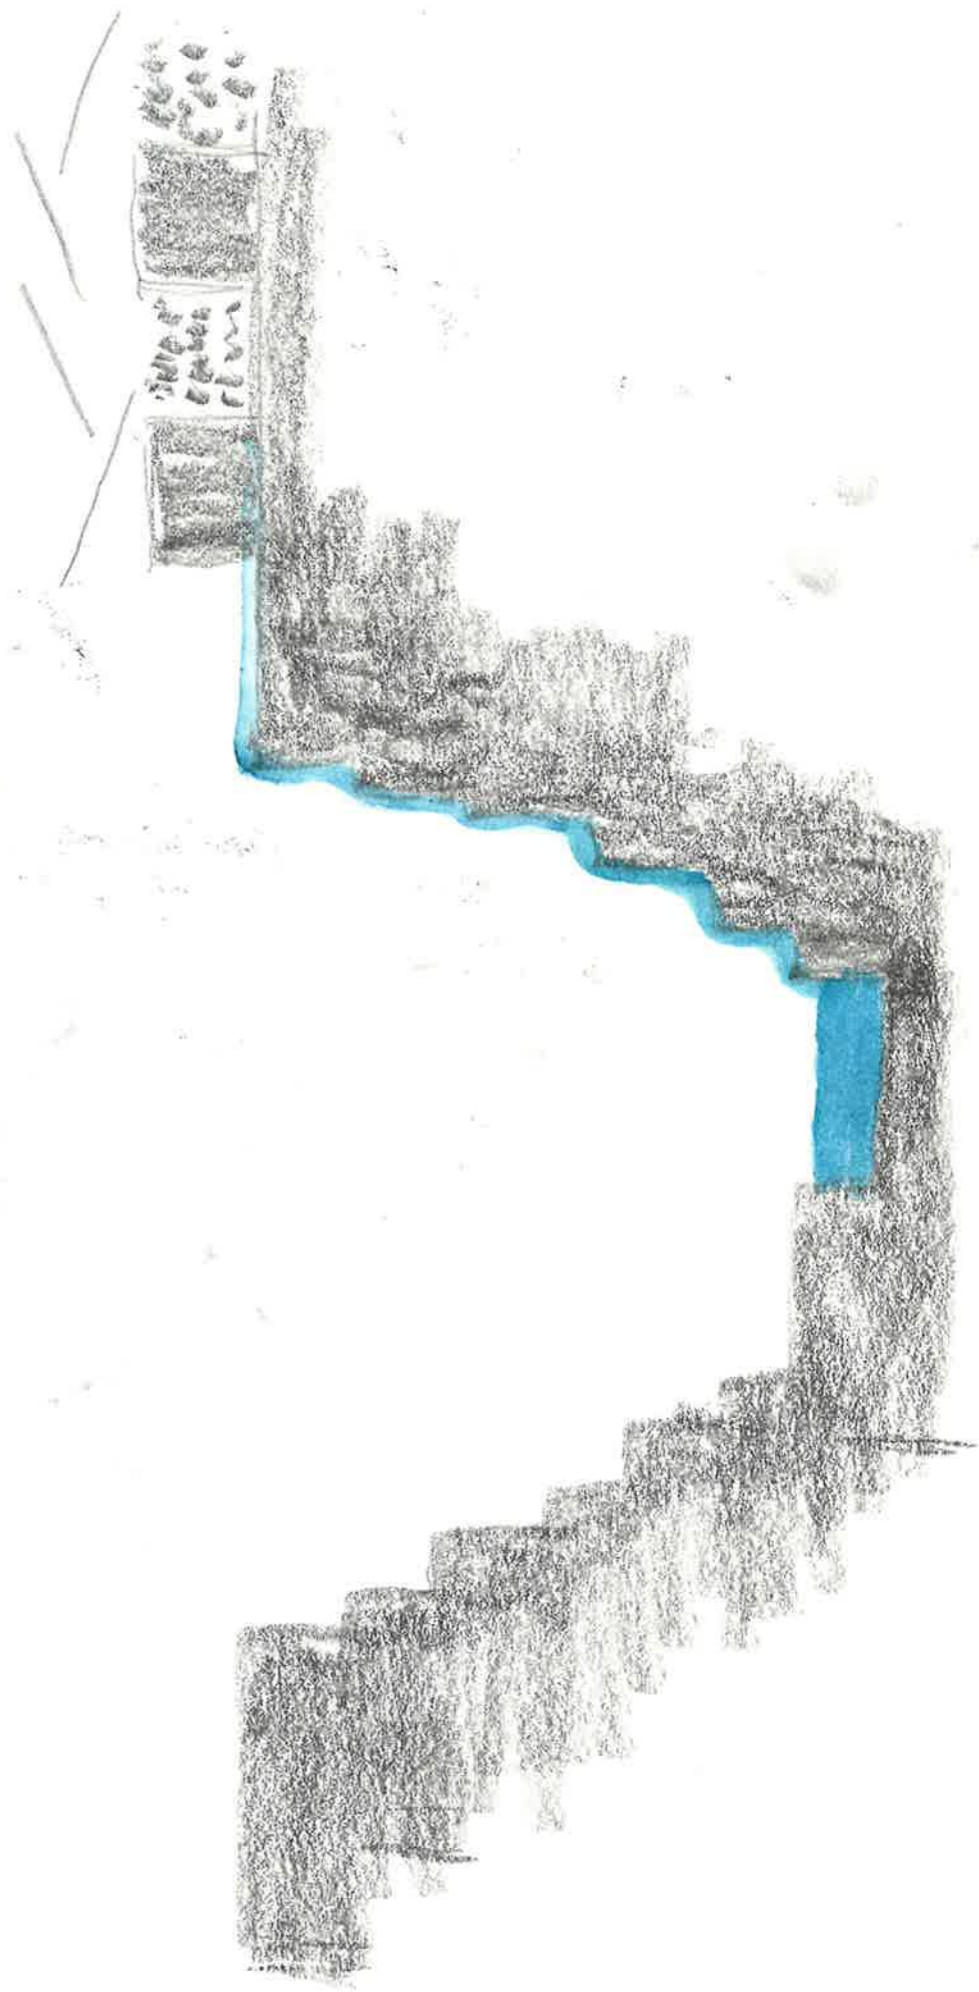

Derfor er vann en viktig

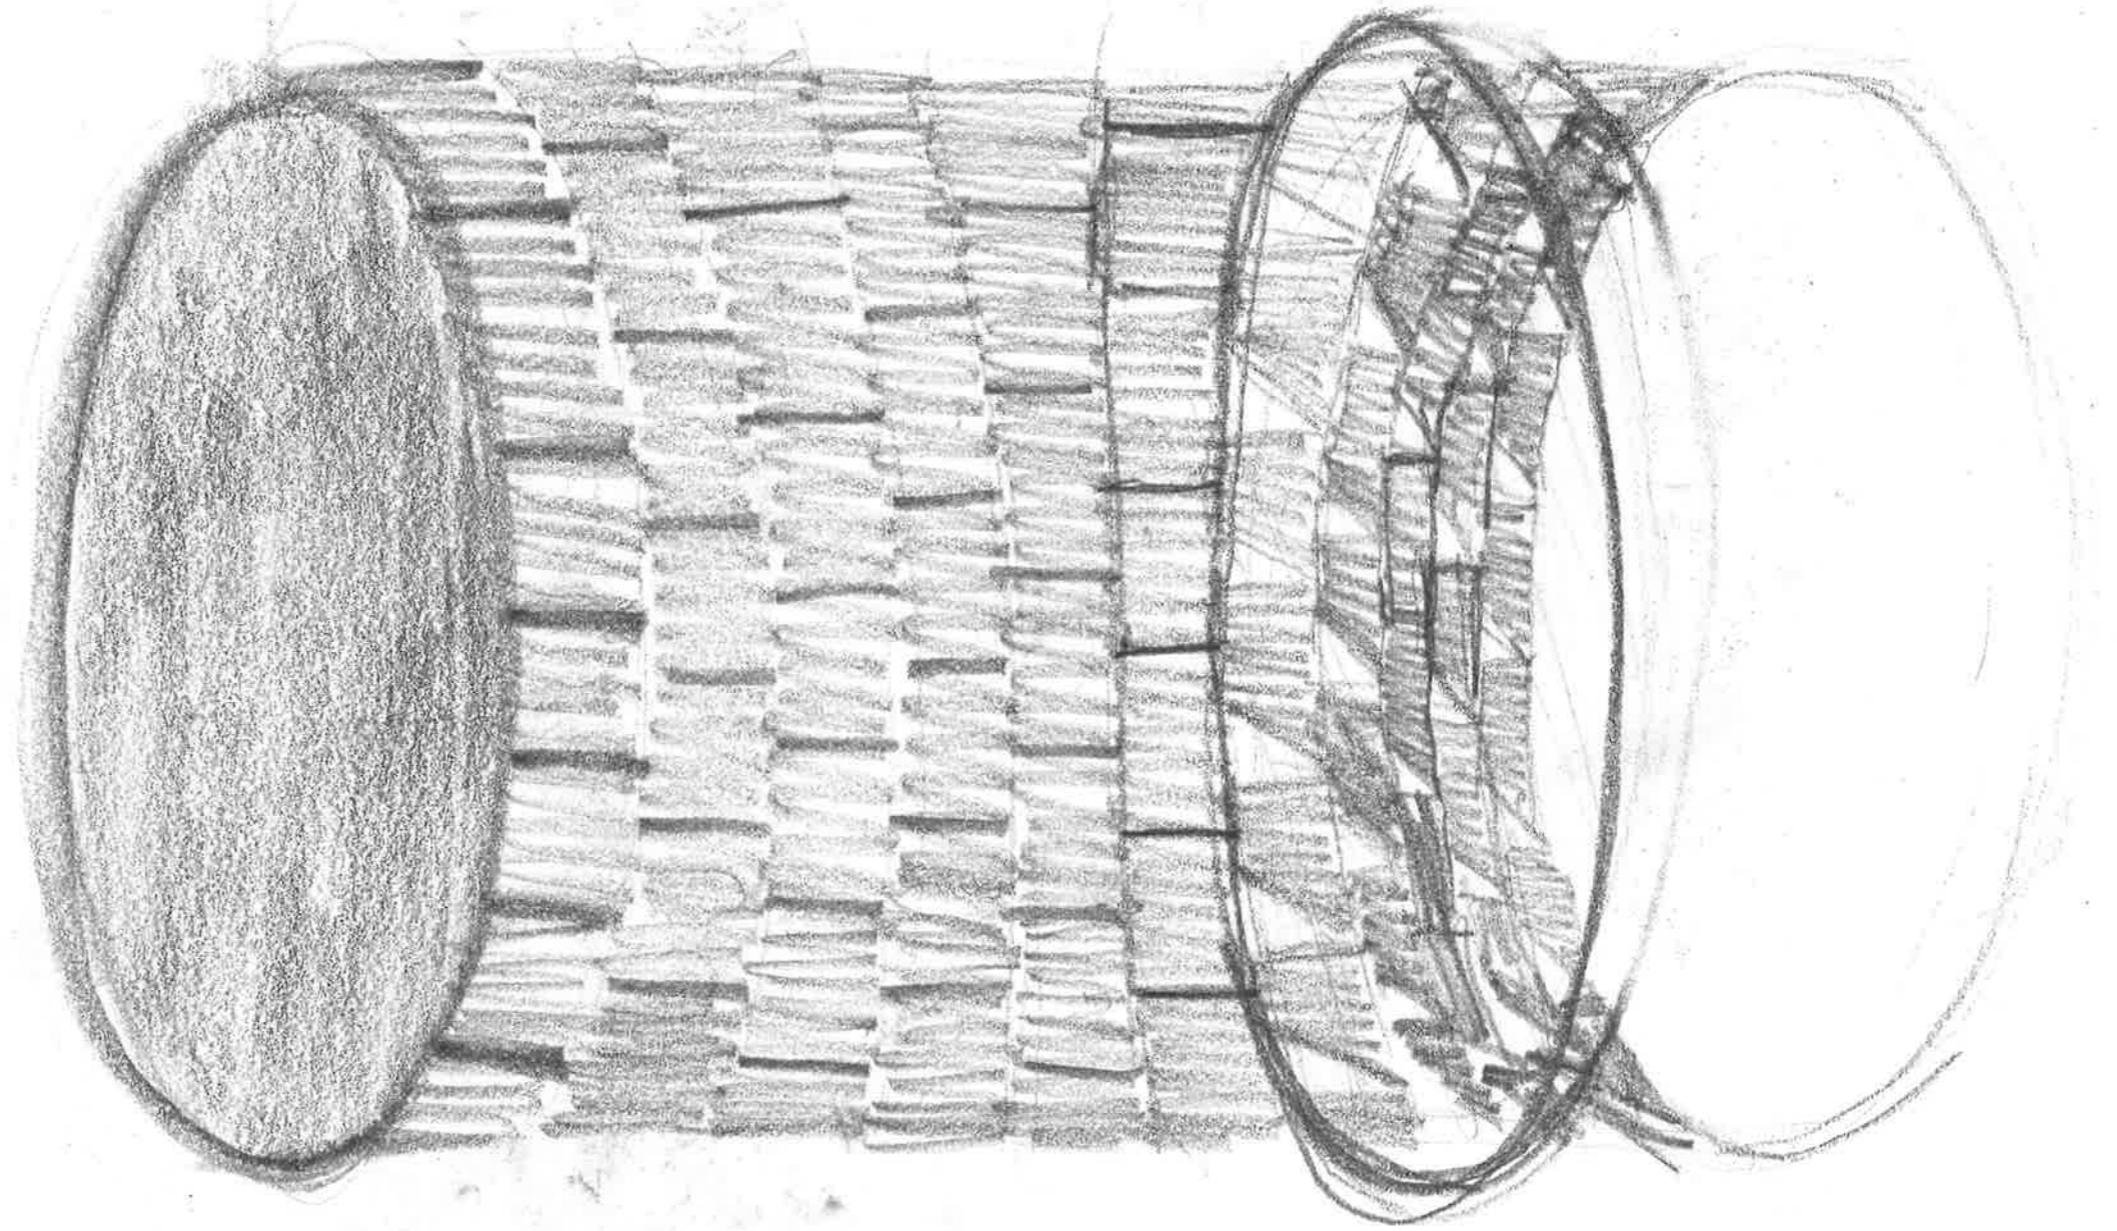

del av utvinnings- og bearbeidings

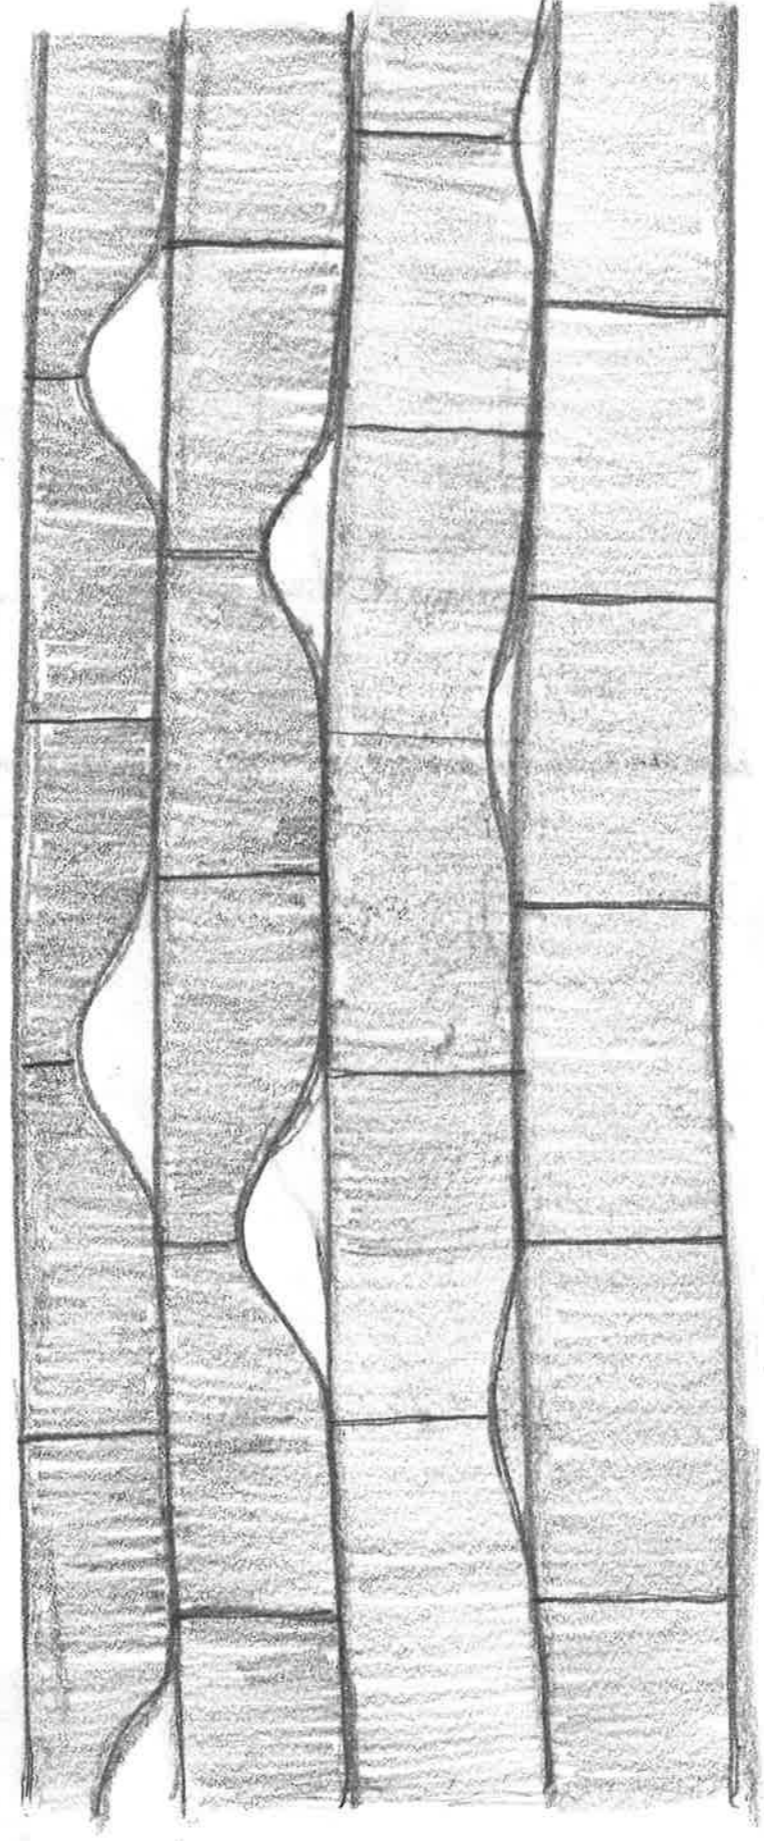

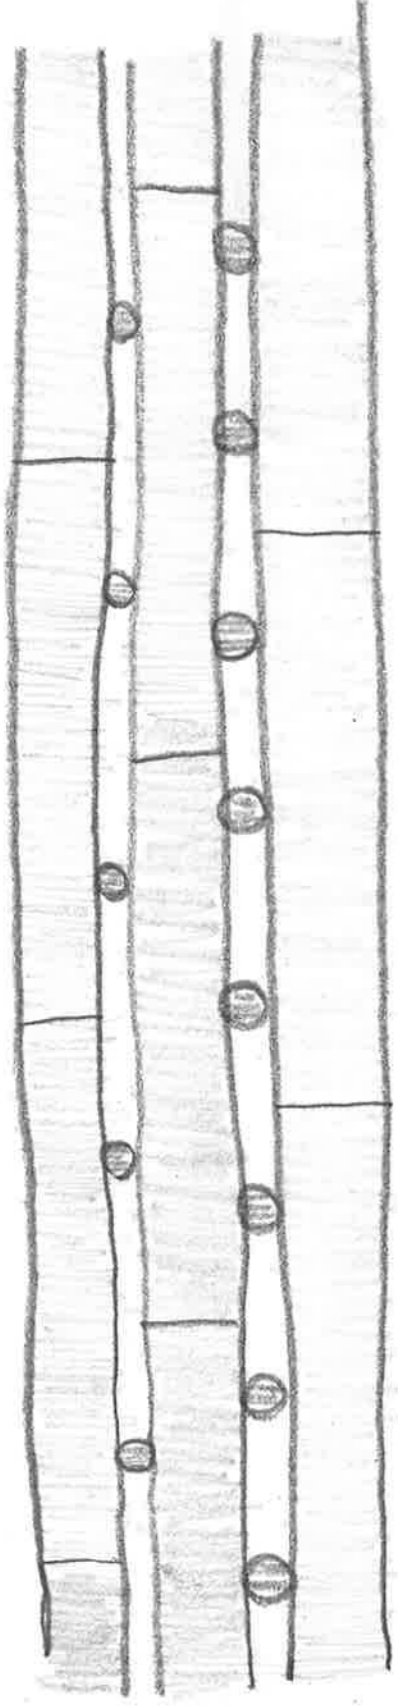

prosessen. → Løse "sjakter" på sidene av lokalet så

vannet kan renne vekk etter spyling av lokalet.

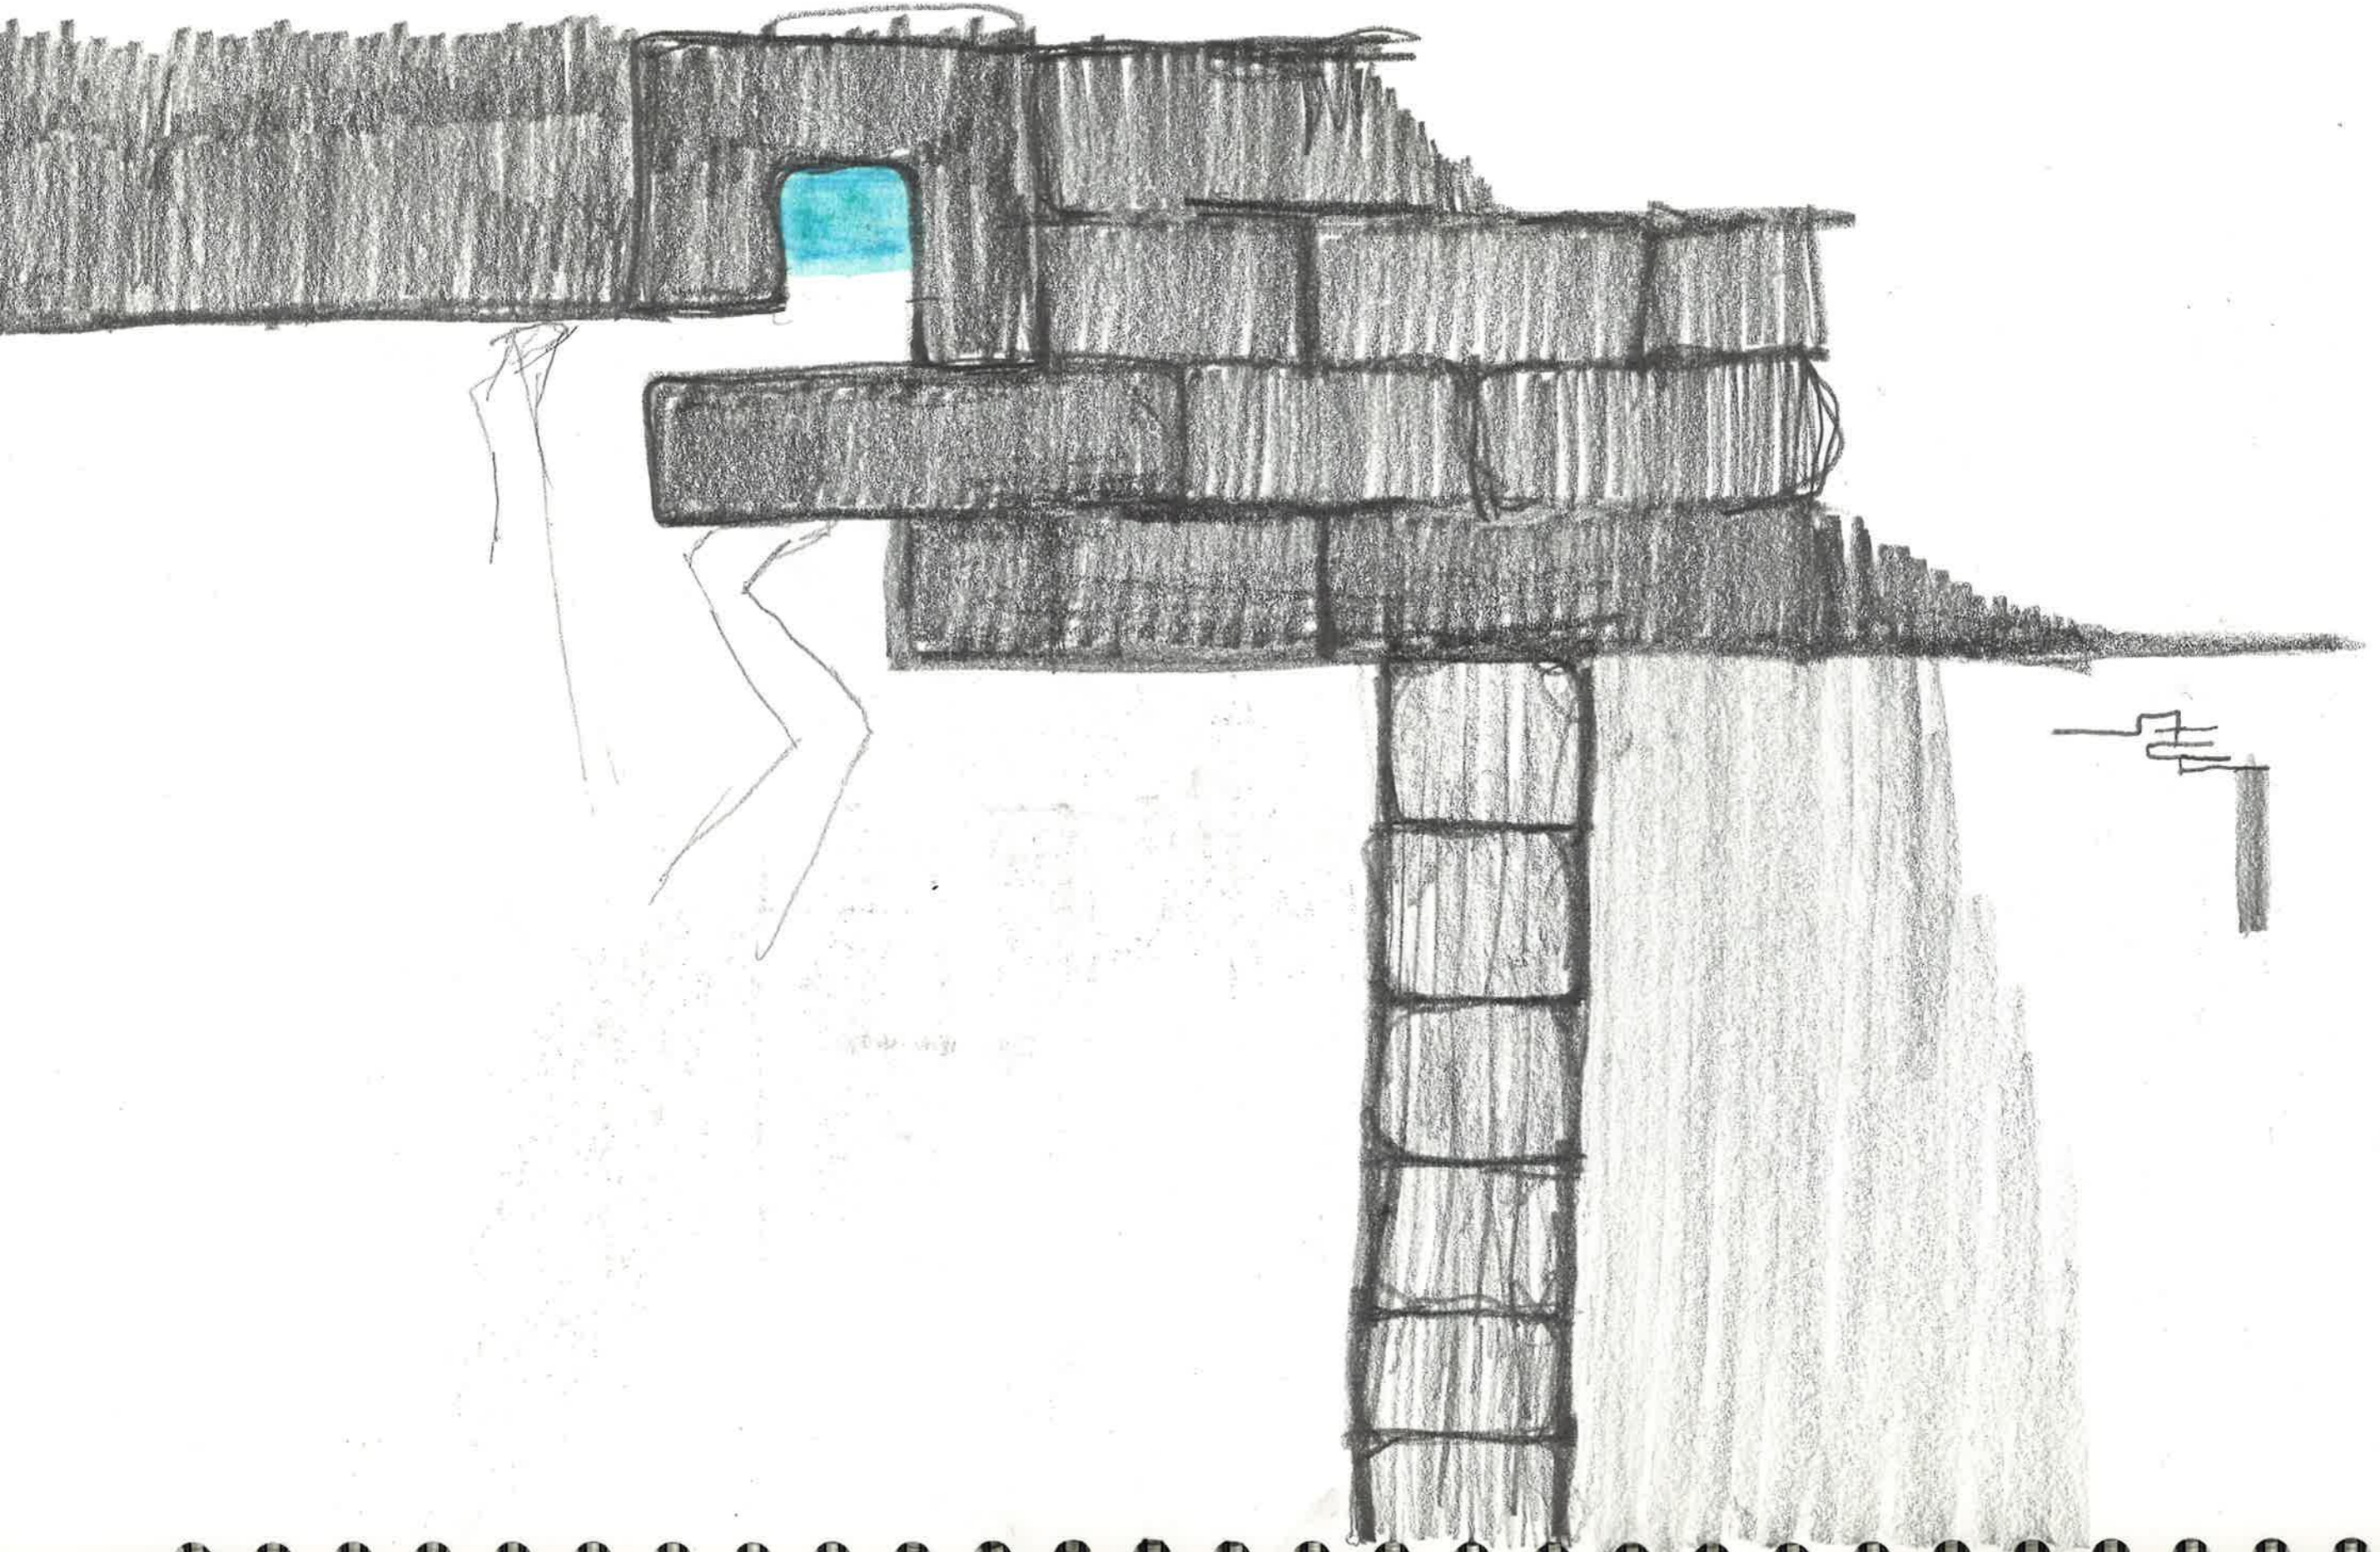

↑ blir det glett?
Hille gulvet?

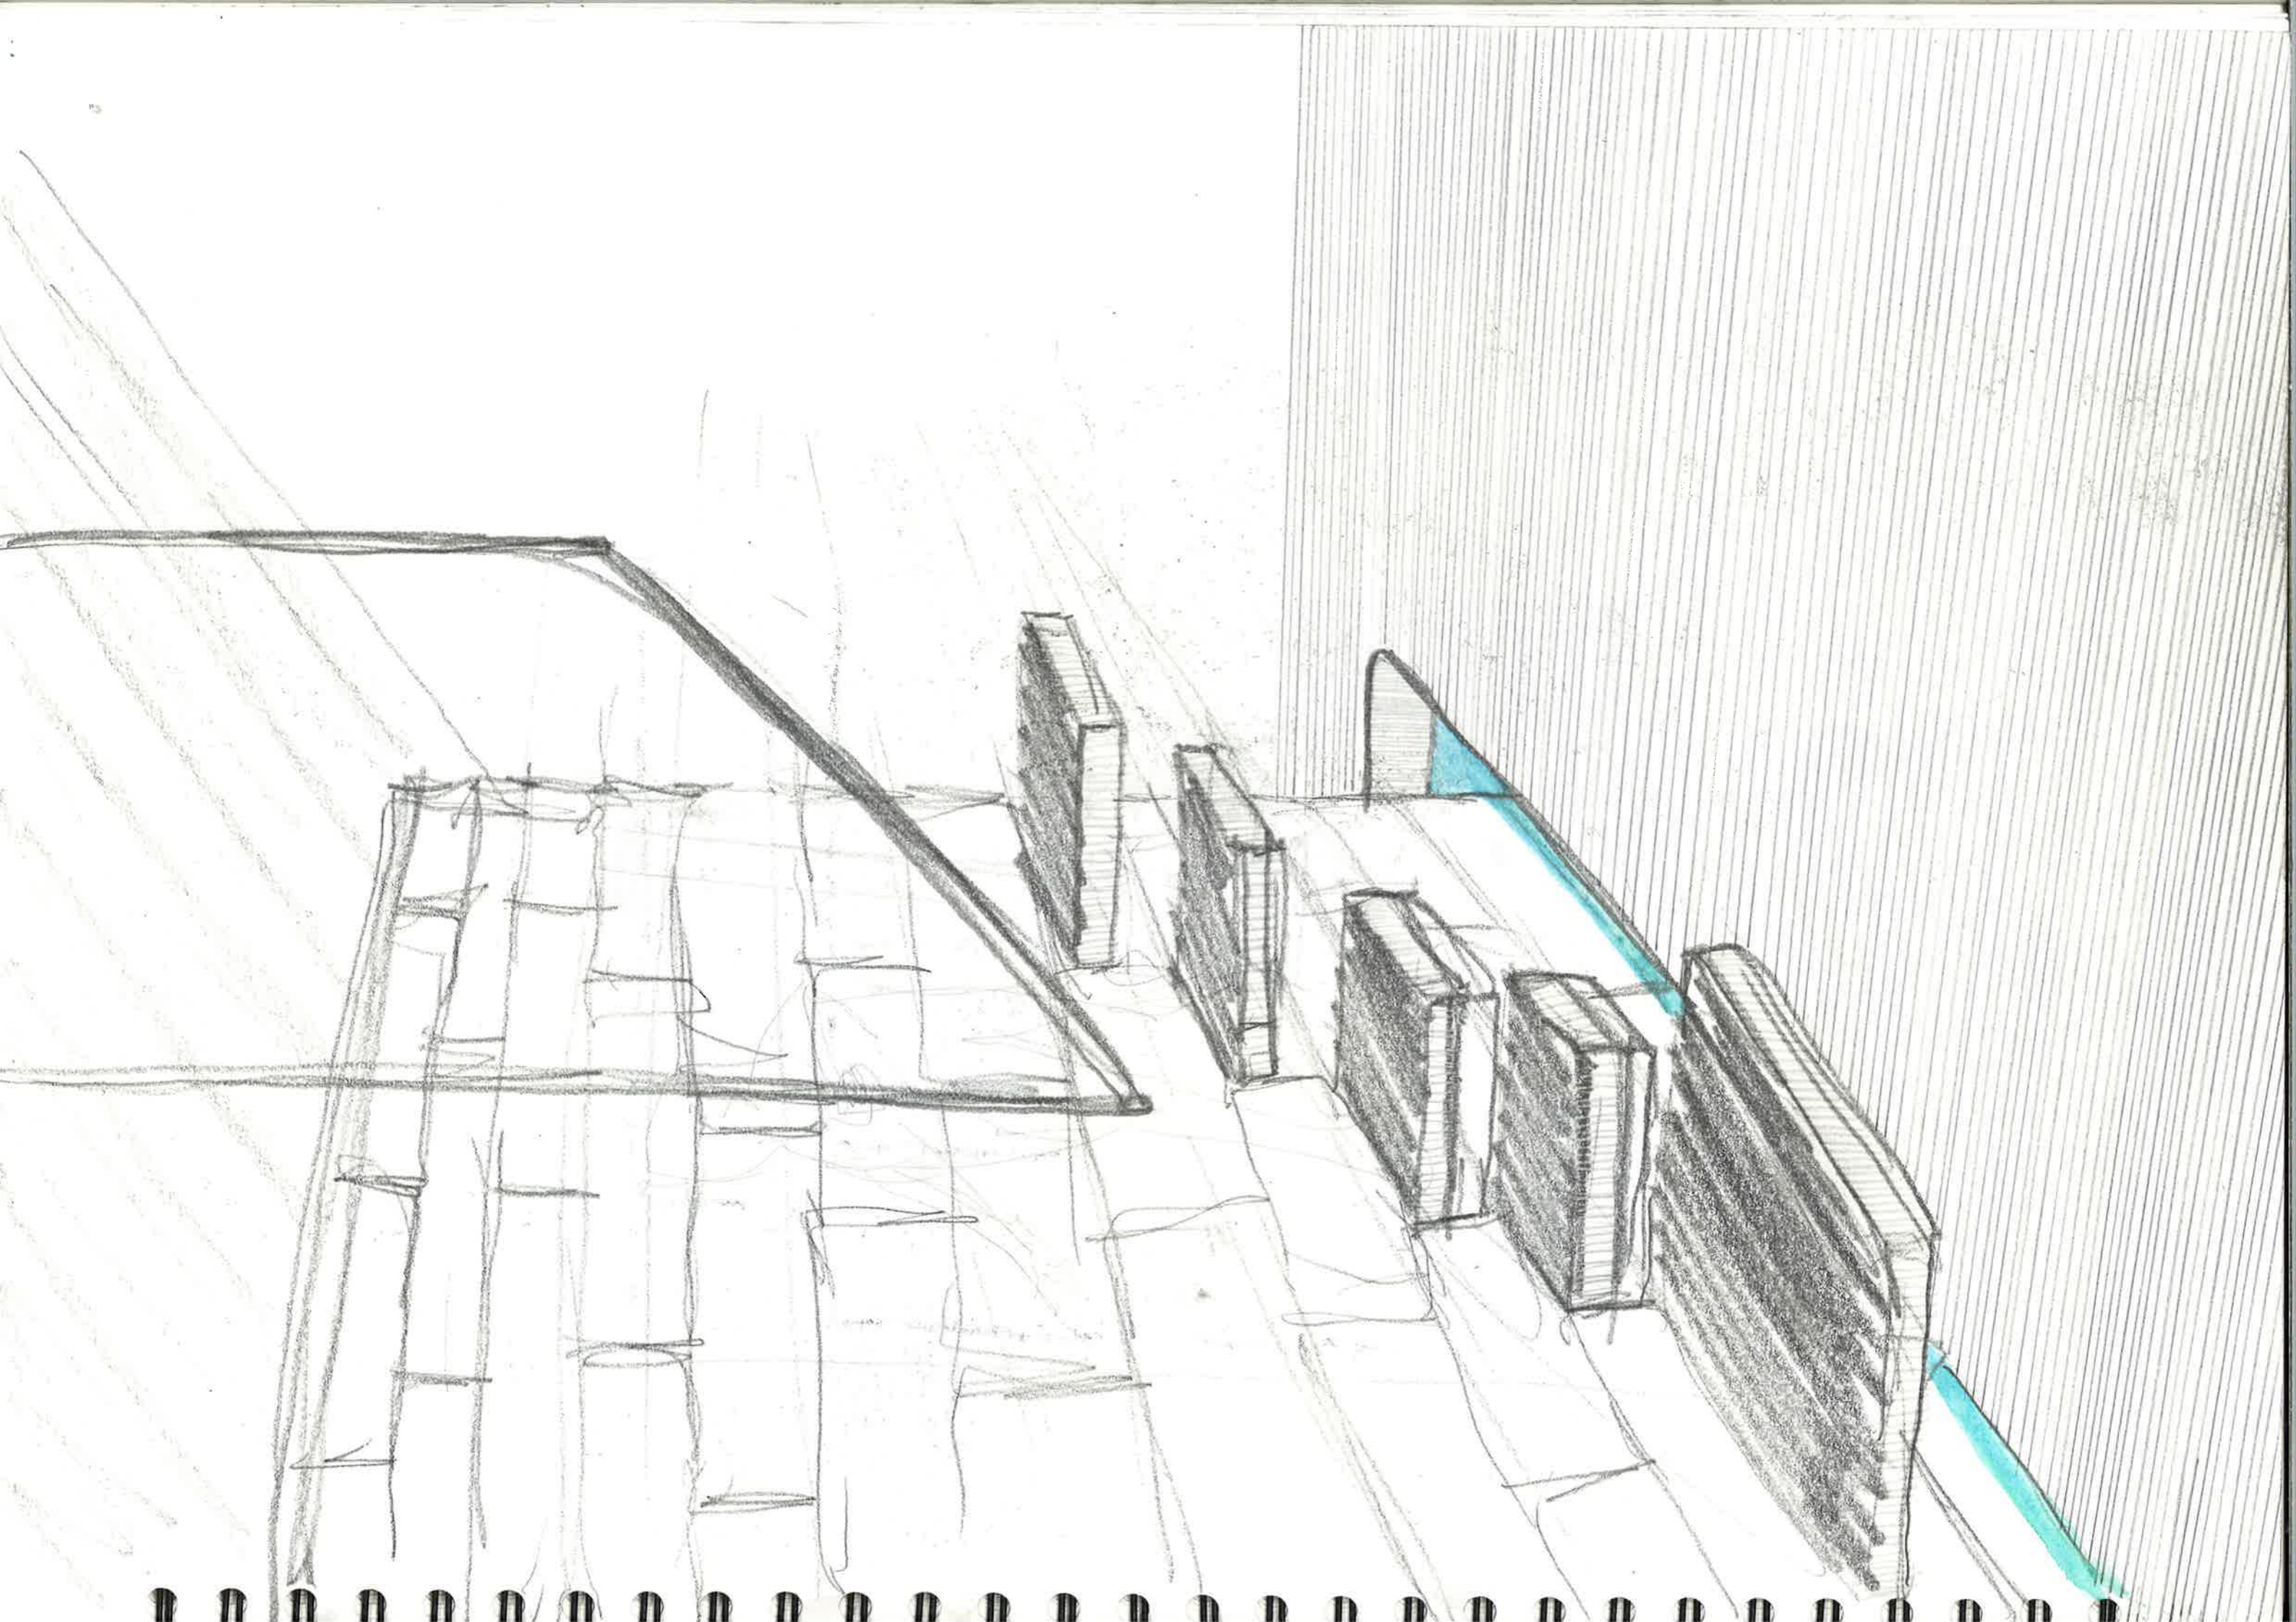

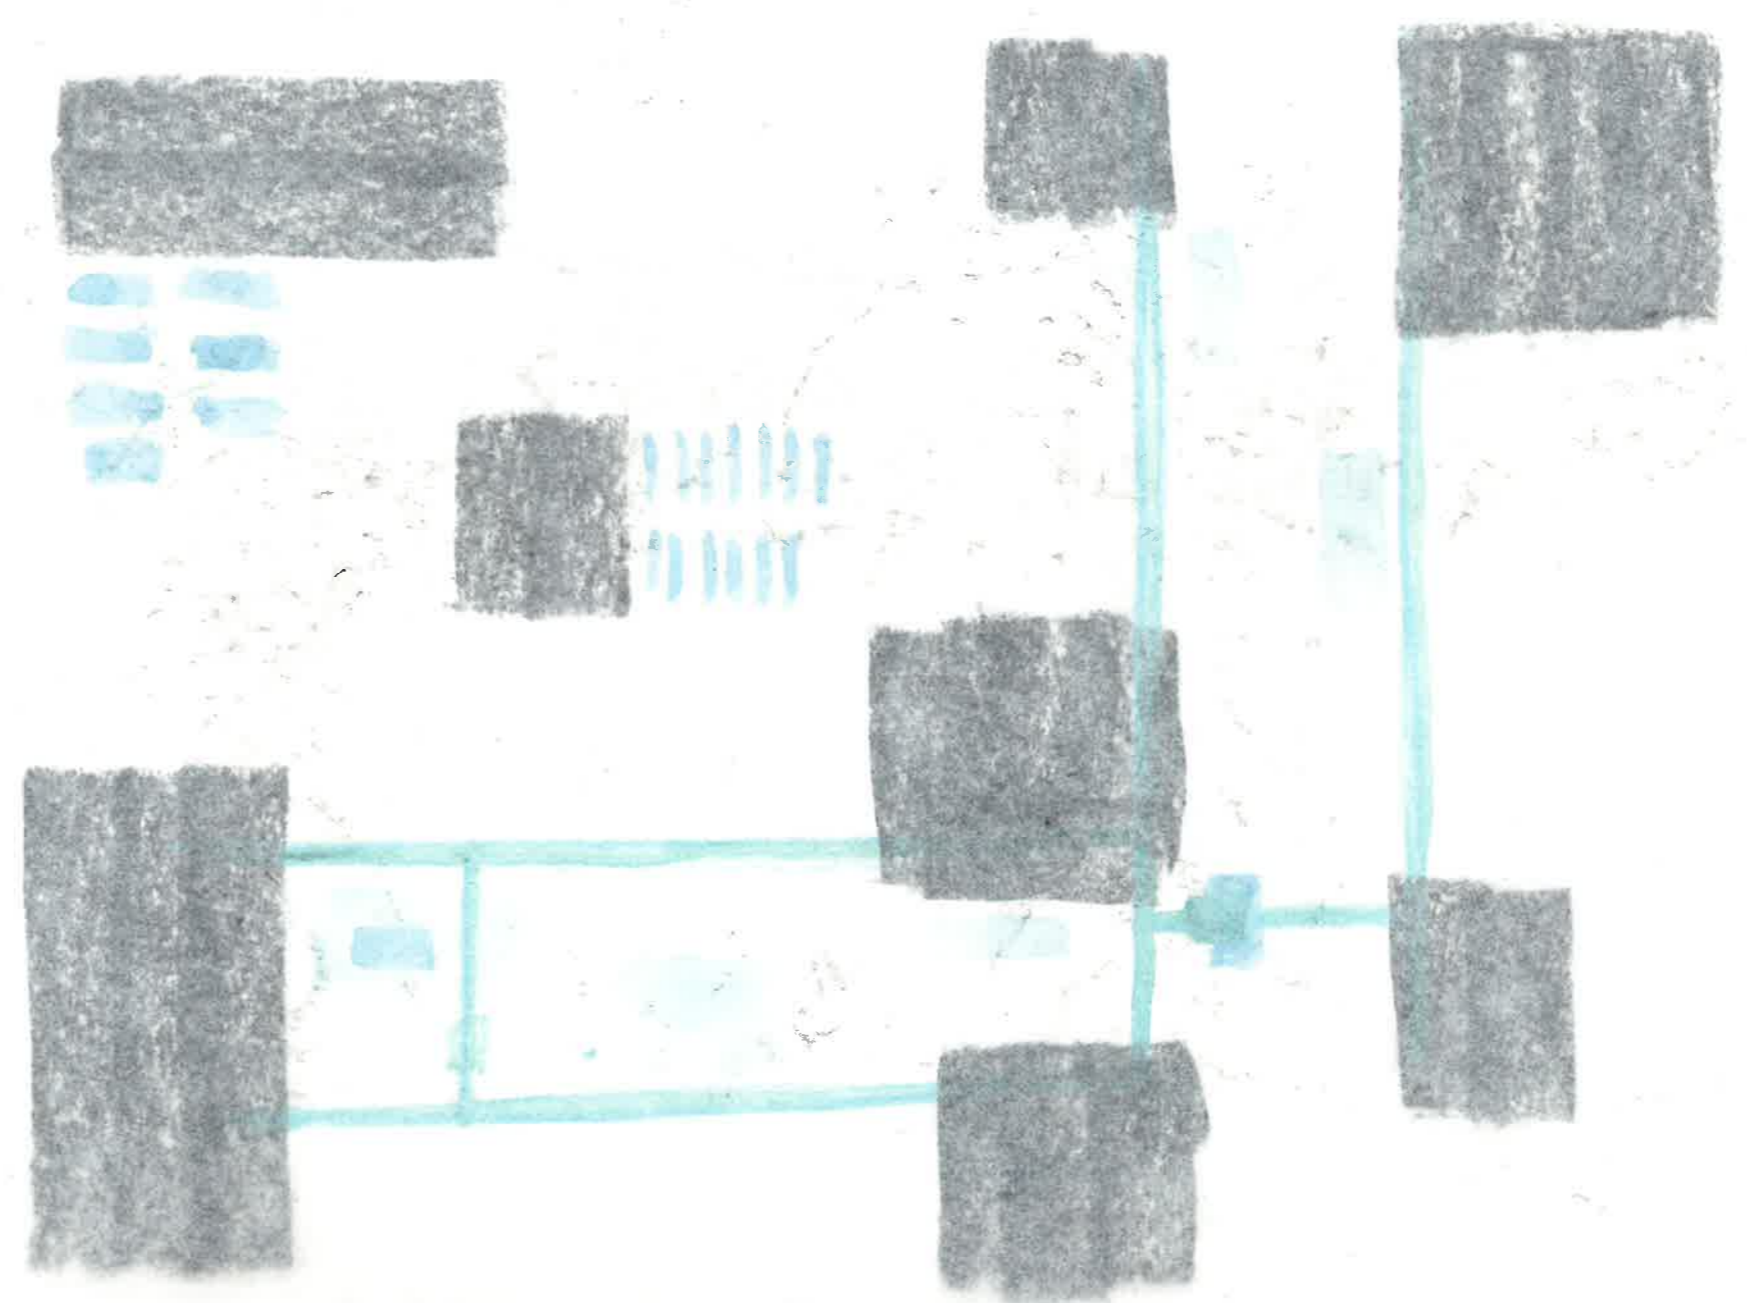

Transition cold space - warm &

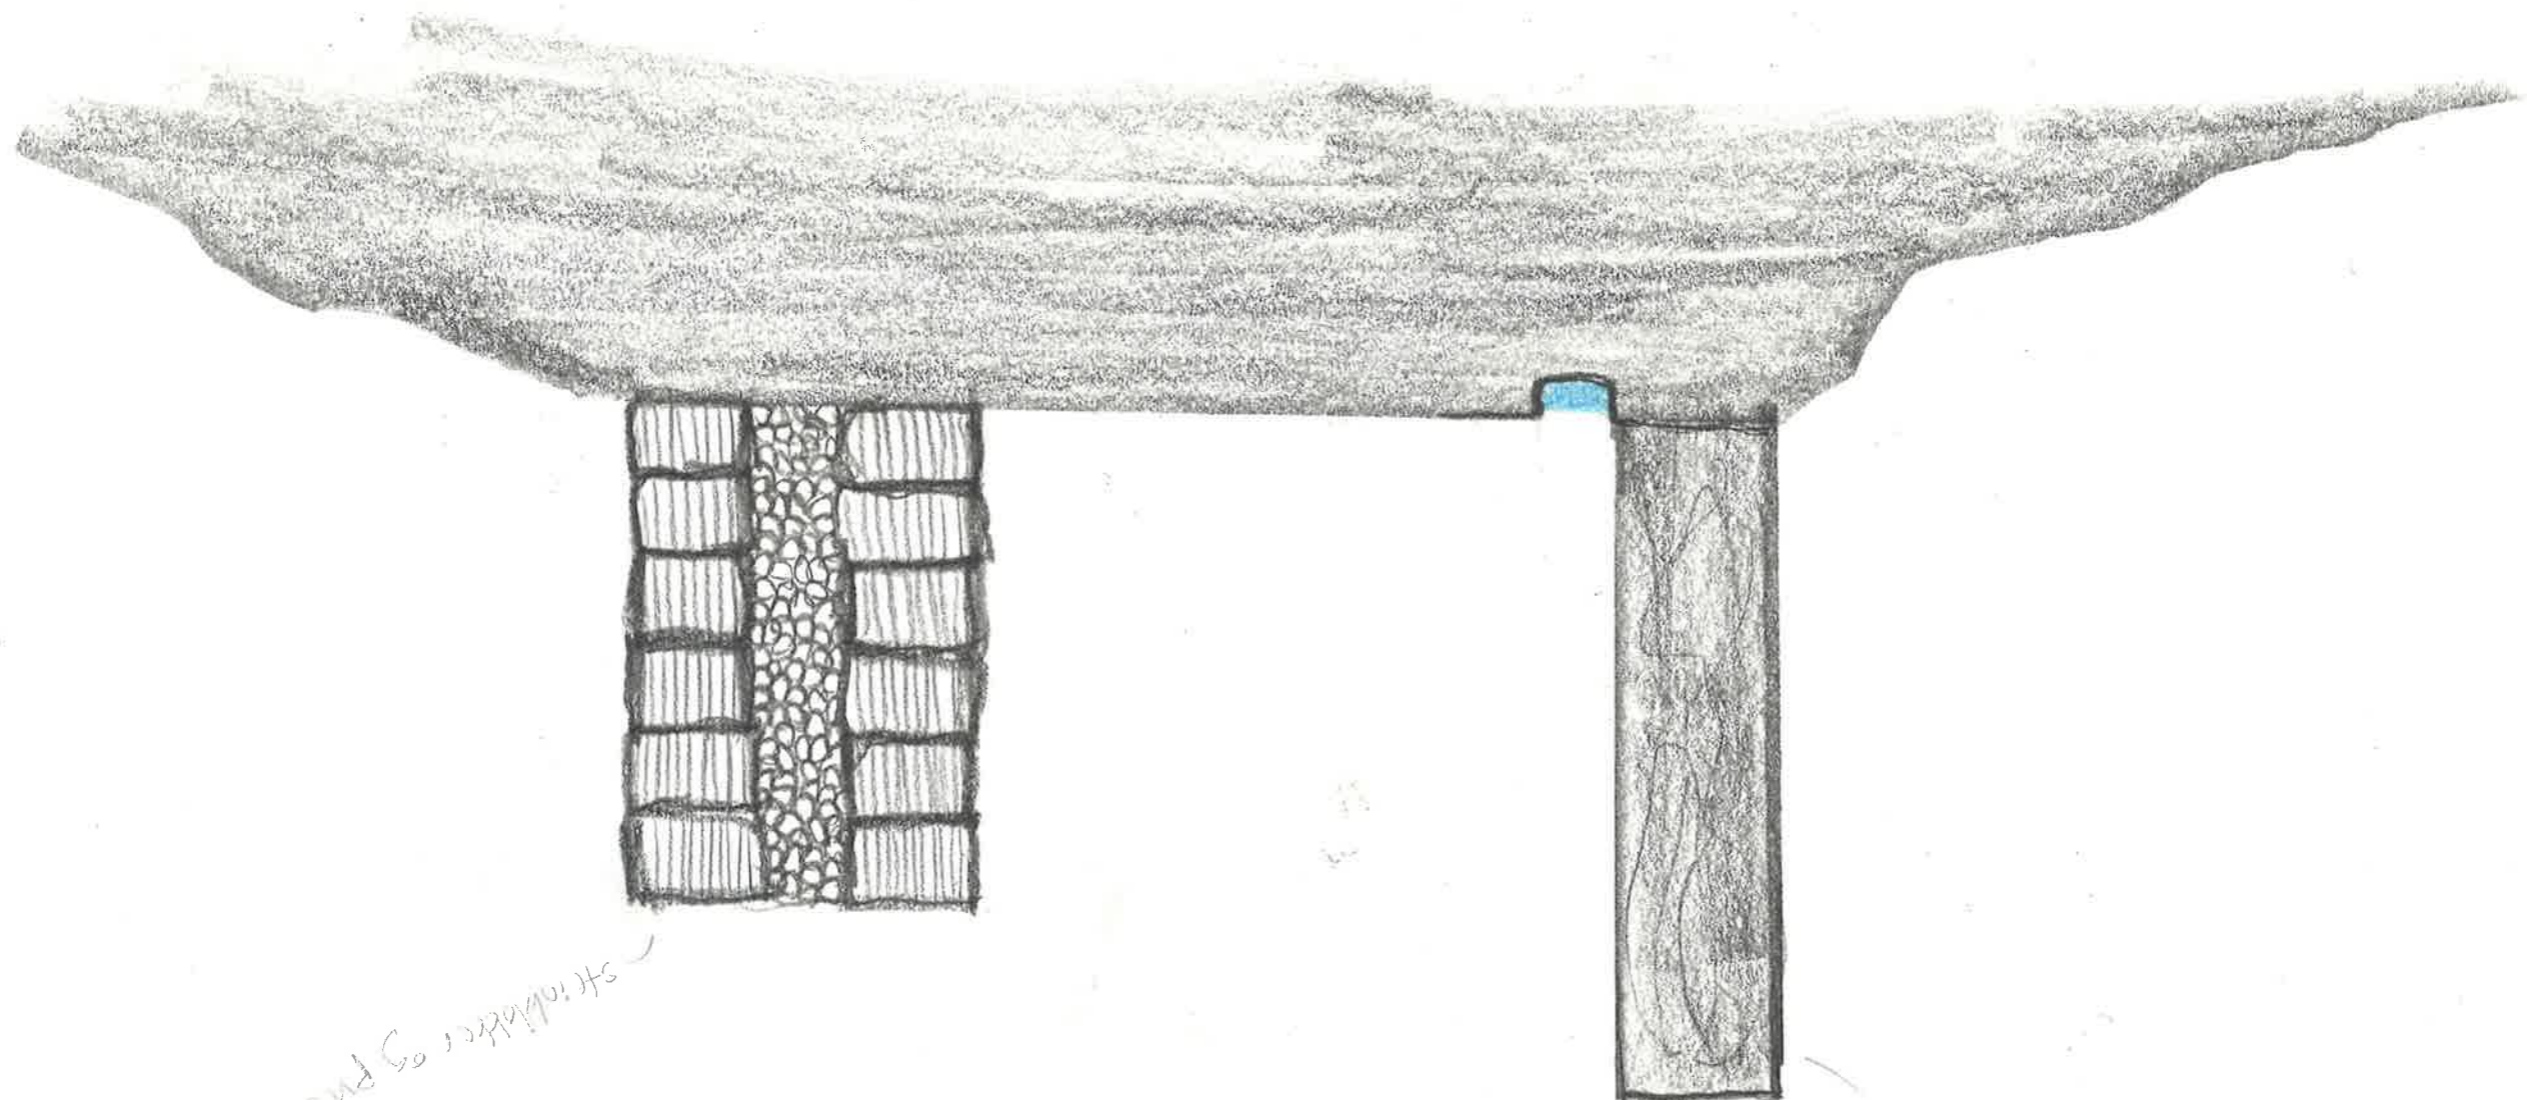

To transfer from a degree
to a degree in physics + math
degree for steinon.

→ Sør nokk topp. Ekspansjon fallet
Vil gå ut i fukt. Røttene
større stambløtter som vegger.
