Hello!

Before, and during, reading my diploma report I invite you to check out the project website. It contains some interactive demos which I think it's good to have visited when reading about it. Link here:

www.backendbooks.no

I will also offer a few alternatives for how to read the report.

1. You can read it on the .pdf you will have received together with this document.

2. You can order a printed version on Lulu, if you prefer a physical format. Link here:

https://www.lulu.com/en/en/shop/axel-berggraf-egen%C3%A6s/backend-books/paperback/product-7w8q94.html

3. You can read a condensed version online[1]. It doesn't contain all the information, but it allows for a more non-linear reading, and it includes a menu for easier navigation. Link here:

www.backendbooks.no/report

I've also included some of the files for the printed matter that was made as part of this diploma.

Axel B. Egenæs

[1] I felt that this diploma required some alternatives to a .pdf report, but this online version was not something I really had the time to develop properly. I invite you to check it out either way, but I wouldn't rely 100% on it :-)
