

ASSISTANCE FROM OTHERS ON MY DIPLOMA PROJECT

The diploma project is categorized as an exam where the student's abilities and knowledge is tried. It is considered cheating to present work others have done as your own.

Diploma project	FRAM - Design for Shareable Futures
Diploma student(s):	Hans Kristian Erlandsen Villa
Institute:	Design

Here you list what kind of help you have received from others in finishing your project (not external counseling or already told cooperation with a company). Ex: assistance building the model, rendering, 3D-printing.

What kind of help I have received?

Due to Covid-19 making it impossible to get assistance from Bergans sewstresses, Britt Erlandsen Villa, my mom, guided me when sewing the prototypes/models. I did all design, patterns, material gathering and sewing while she taught me how to sew on machine and assisted me during the most difficult parts. Sewing a «weather rough» sleeping bag is tough on a standard sewing machine considering materials and nozzles and I am glad that I had her by my side to guide me.
