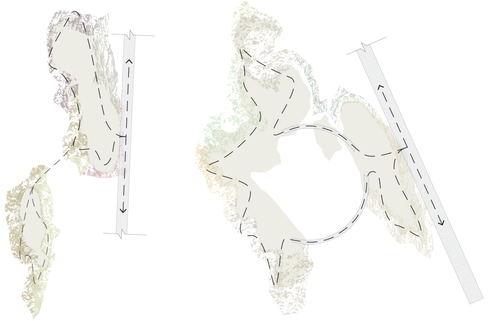
Itineraries

Scale 1 : 1 000

PEDESTRIAN ITINERARY



The Northern Island Visit

Dependent on tide.

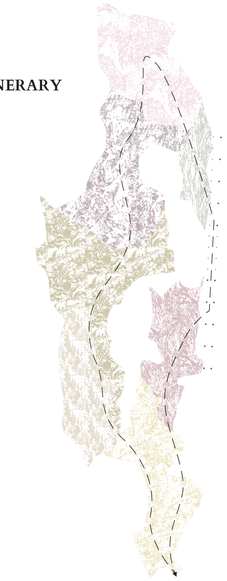
The Southern Island Visit

A visit of the incubator facility.

SNORKELING ITINERARY

Beginner's visit

A visit through shallow and protected seaweeds.



The Chloro and Octrophytes

A visit through dark colored seaweed, a color given by pigments found in plastids.

Anthroposcenic weed of Oslo

A visit through the most common seaweeds found in the Oslofjord since the Industrial Revolution.

The Rhodophytes

A visit through light colored seaweed, a color given by pigments found in plastids.

SNORKELING OR DIVING ITINERARY

The Nursery

A visit through the seaweed nursery.

The 4,5 Contour

A visit through deeper ends where seaweeds tend to look different; using air bladders for example to reach upwards.

Beyond

A visit beyond the seaweed where light dims and other creatures inhabit.
