

Sketchbook 1

line stone mest av under sanden.
 Jord kompression

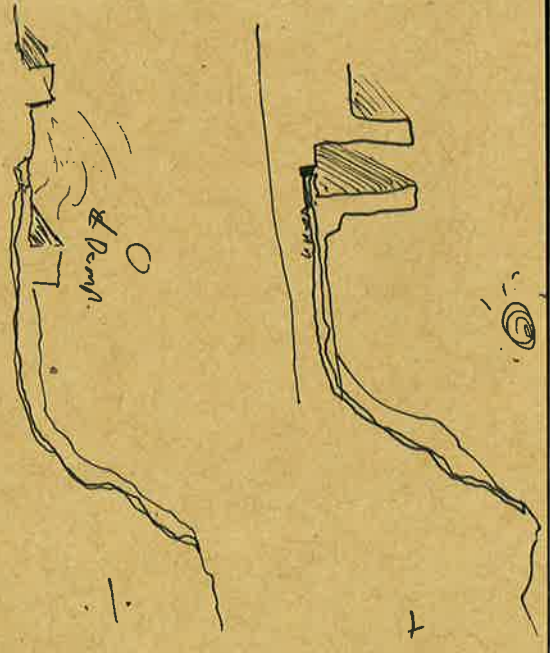

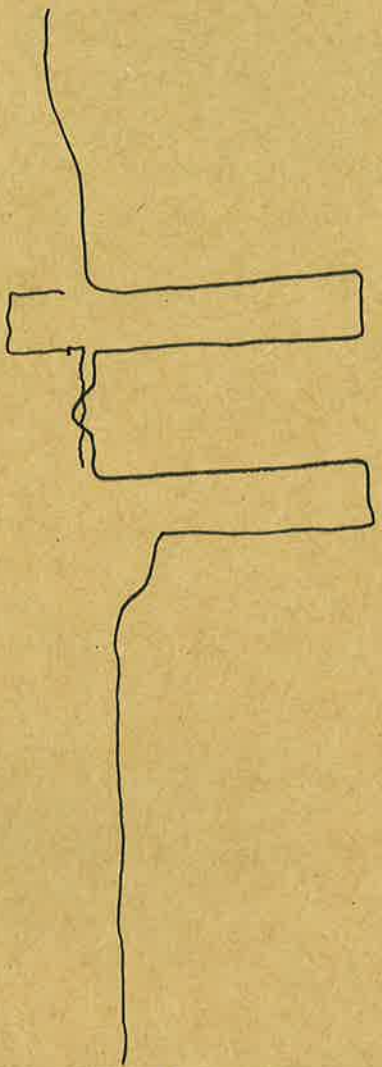

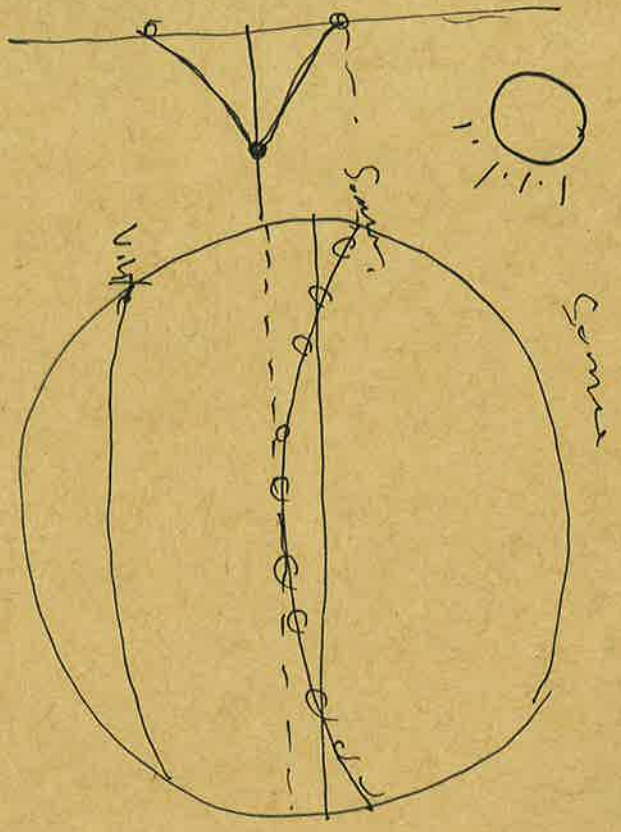

Temperature

Sommer (KYNIS) Temp faller ned 15-20°C side.

Sol position.

er lidt usikker på skala.

Midt i øknen kunne være større skala end ses her set for mes.

Må være støt nok for at det skal si menis i værdi der.

Når en stor by "fitter" mindre scale og vindbygt felt mere den forholdes der mig til en natur?

Det vil sige med en lignende skala. Ikke store områder men kan ses dette når ses tanker på et sted som hvarstue ligger langt væk.

Model (Sten.) snitt?

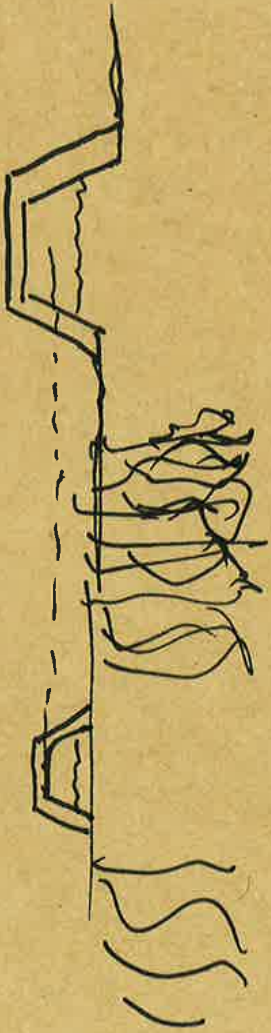

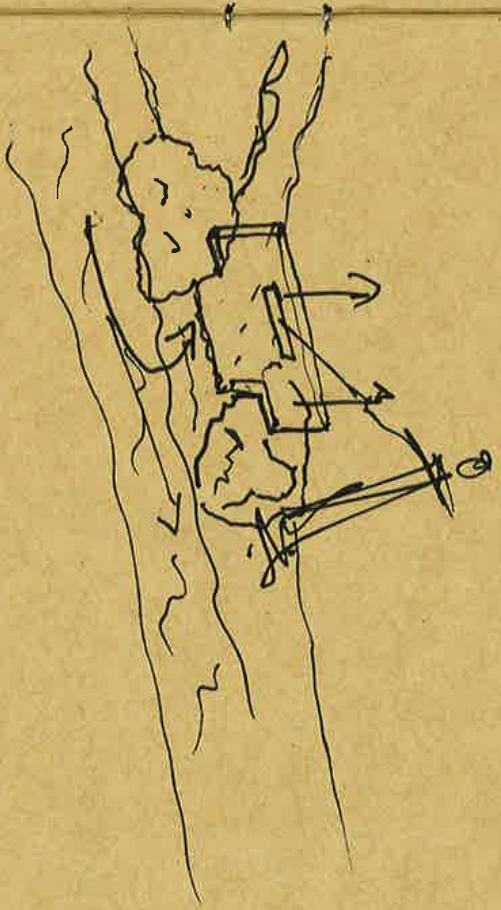

inngang

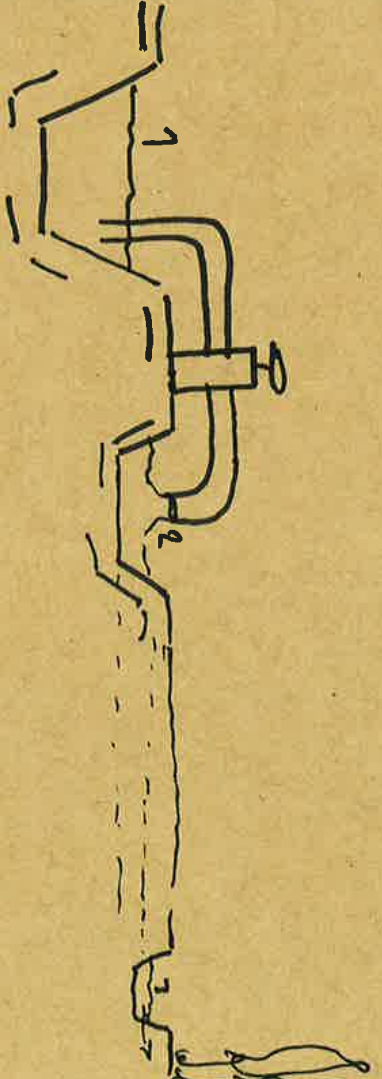

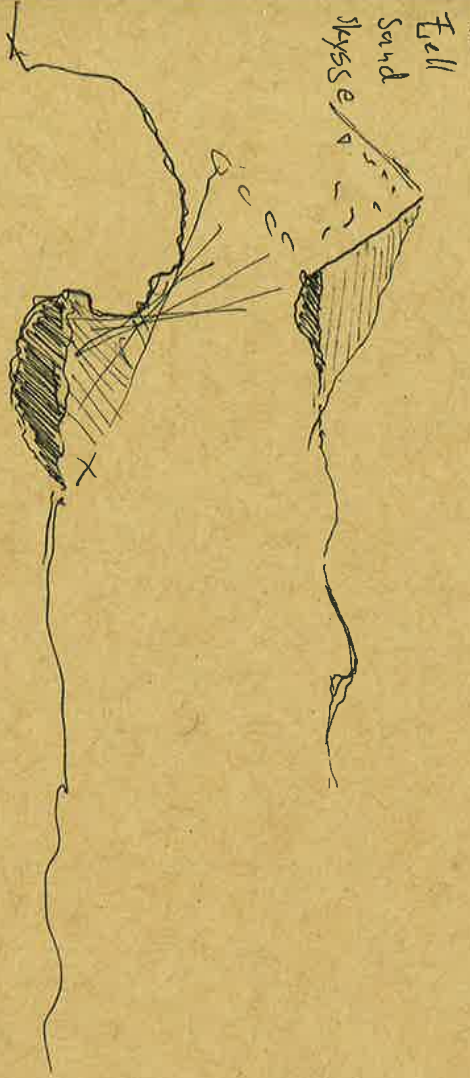

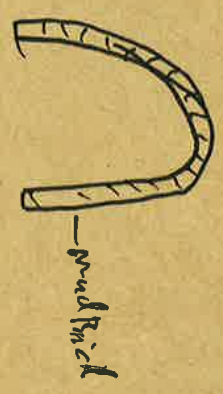

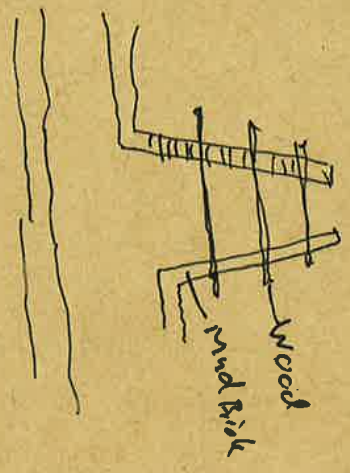

vindisk sand

Trigonometriske AS stiller på 29010

Skjærsund

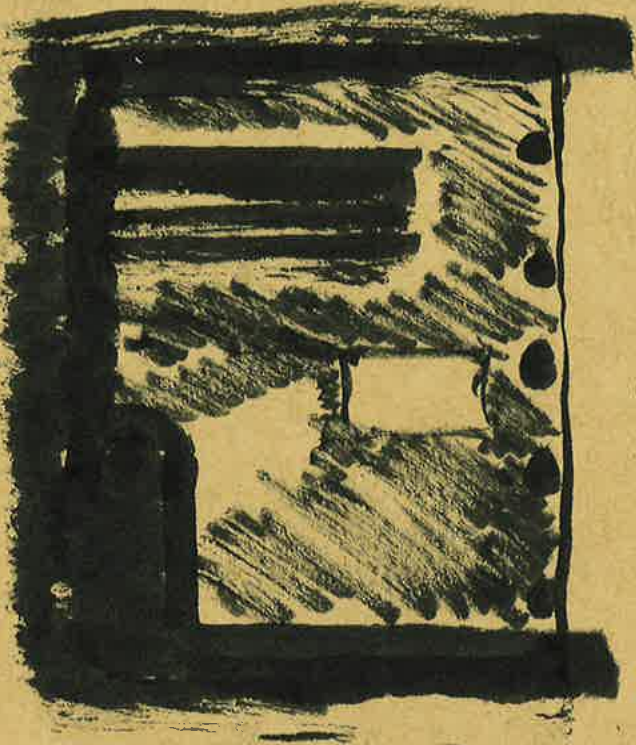

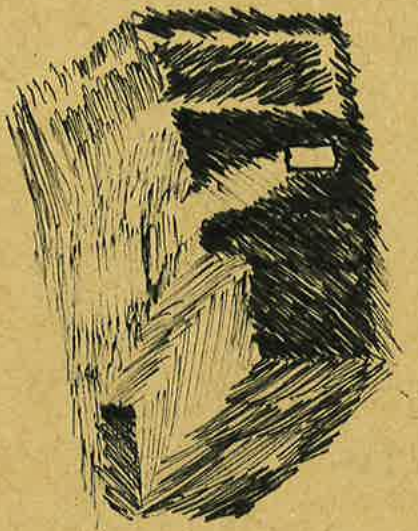

Højd max 20-25 meter. Nander
 kronen 6-10 meter
 4-6 år før de gir frukter (7-12 år nå)
 Harvest 3 mnd.
