

New Program

In my Pre-Diploma I stated the program for my diploma project to be a proposal for a new town centre in Karasjok.

During the Diploma semester I have narrowed the scope of the project to:

A primary school for 140 students

In addition to classrooms, the school will offer specialized rooms for **doudji** (Sámi traditional arts and crafts), **music**, **food preparation**, and a **public library**. The school will function as a community centre, and includes a **stage** for music and theatre. These spaces are shared with the general public, as well as the neighbouring secondary school.
